Education

University of North Texas *May 2019 - Aug 2022*
Ph.D., Computer Science and Engineering GPA: 4.0/4.0

Tennessee Tech University *Aug 2016 - Dec 2018*
M.Sc., Computer Science GPA: 4.0/4.0

Bangladesh University of Engineering and Technology *Dec 2004 - Oct 2009*
B.Sc., Computer Science and Engineering

Coursera.org *Aug 2017 - Apr 2018*
Deep Learning Specialization

Research Interests

Natural language understanding, information extraction, natural language generation, dialog systems, multilinguality, commonsense reasoning, artificial intelligence, and machine/deep learning

Employment History

Graduate Research Assistant, CSE, UNT May 2019 - Current

· Research areas: natural language understanding, multilinguality, factuality, and commonsense reasoning

Sr. Engineer/Executive (Business Intelligence), GrameenPhone Ltd. Mar 2012 - Dec 2015

· Work areas: development of ETL and Machine Learning models (e.g., churn prediction, customer profiling)
· Received **Top Talent Employee** recognition in 2014 for notable performance

Software Engineer, Samsung Bangladesh R&D Center Nov 2010 - Feb 2012

· Work areas: development and integration of new features and functionalities to Samsung mobile platforms

Research Intern, Analytics and Machine Intelligence, Raytheon BBN May 2020 - Aug 2020

· Work areas: Information Extraction (e.g., events, arguments, and relation extraction)

Research Intern, ORISE, Oak Ridge National Lab May 2017 - Aug 2017

· Work areas: Computer Vision (time/memory analysis of CNNs (e.g., GoogleNet and ResNet) in HPC)

Technical Skills

Programming:	Python, C++, Java, R, Matlab, MPI, CUDA
Machine Learning	Neural Networks, SVM, PCA, BiLSTM, CNN, Transformers, etc.
Pre-trained models	ELMo, BERT, XLNet, RoBERTa, XLM-RoBERTa, mBERT, T5, etc.
ML Tools	PyTorch, Keras, TensorFlow

Ongoing Research Projects

Negation and Affirmative Interpretation

· Every language contains negation, and the intelligent systems often have difficulty solving problems in instances containing negation. In this project, we explore how negation can be comprehended and propose a question-answer driven methodology to reveal the affirmative interpretations of negations.

Multilingual Negation

· We study the semantics and typological perspectives of negation in a wide range of languages. Our study further explores the possibilities of cross-lingual transfer of negation (e.g., zero-shot, few-shot, and projection) from one language to another.
